### **HELP PREVENT THE SPREAD OF AQUATIC INVASIVE SPECIES**

With boating season upon us, it's important to remember to help prevent the spread of [aquatic invasive species \(AIS\)](#) using the "clean, drain, dry" method for boats, as well as disinfecting fishing gear. Boat stewards are available at more than 200 launches across New York State to educate and assist boaters in practicing these techniques every time they come off the water and prior to launching.

AIS Prevention Tips:

- Inspect your watercraft and trailer, and remove anything that shouldn't be there, like plants, animals, mud, or debris.
- Discard in a trash can or at a disposal station.
- Drain all water-holding compartments.
- Wash your boat and allow it to fully dry before entering a new water body.
- When there's no time to dry between uses, disinfect with hot water that's at least 140 degrees Fahrenheit, or visit a [decontamination site](#).
